2 [Signature of symmetric rational matrices and the unitary dual of lie groups](#)

Jeffrey Adams, B. David Saunders, Zhendong Wan

July 2005 ISSAC '05: Proceedings of the 2005 international symposium on Symbolic and algebraic computation

Publisher: ACM

Full text available: [pdf\(410.88 KB\)](#) [Additional Information: full citation, abstract, references, index terms](#)

Bibliometrics: Downloads (6 Weeks): 1, Downloads (12 Months): 19, Citation Count: 0

A key step in the computation of the unitary dual of a Lie group is the determination if certain rational symmetric matrices are positive semi-definite. The size of some of the computations dictates that high performance integer matrix computations be ...

Keywords: lie group, matrix signature, symmetric matrix

3 [Learning Equivariant Functions with Matrix Valued Kernels](#)

Marco Reisert, Hans Burkhardt

May 2007 The Journal of Machine Learning Research, Volume 8

Publisher: MIT Press

Full text available: [pdf\(410.54 KB\)](#) [Additional Information: full citation, abstract, references, index terms](#)

Bibliometrics: Downloads (6 Weeks): 1, Downloads (12 Months): 48, Citation Count: 0

4 [Smooth invariant interpolation of rotations](#)

F. C. Park, Bahram Ravani

July 1997 ACM Transactions on Graphics (TOG), Volume 16 Issue 3

Publisher: ACM

Full text available: [pdf\(561.24 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

Bibliometrics: Downloads (6 Weeks): 10, Downloads (12 Months): 101, Citation Count: 9

We present an algorithm for generating a twice-differentiable curve on the rotation group $SO(3)$ that interpolated a given ordered set of rotation matrices at their specified knot times. In our approach we regard $SO(3)$ as a Lie group with a bi-invariant ...

Keyw ords: Lie algebra, Lie group, cubic spline, interpolation, mathematics, rotation

5 [Quantum mechanical algorithms for the nonabelian hidden subgroup problem](#)

Michelangelo Grigni, Leonard Schulman, Monica Vazirani, Umesh Vazirani

July 2001 STOC '01: Proceedings of the thirty-third annual ACM symposium on Theory of computing

Publisher: ACM

Full text available: [pdf\(174.83 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

Bibliometrics: Downloads (6 Weeks): 1, Downloads (12 Months): 21, Citation Count: 16

We provide positive and negative results concerning the "standard method" of identifying a hidden subgroup of a nonabelian group using a quantum computer.

6 [On the completeness of object-creating database transformation languages](#)

Jan Van Den Bussche, Dirk Van Gucht, Marc Andries, Marc Gyssens

March 1997 Journal of the ACM (JACM), Volume 44 Issue 2

Publisher: ACM

Full text available: [pdf\(603.60 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

Bibliometrics: Downloads (6 Weeks): 6, Downloads (12 Months): 65, Citation Count: 2

Object-oriented applications of database systems require database transformations involving nonstandard functionalities such as set manipulation and object creation, that is, the introduction of new domain elements. To deal with these functionalities, ...

Keyw ords: computational completeness, constructive transformation, first-order logic, object creation, object-oriented database, while loop

7 [A data structure for a uniform approach to computations with finite groups](#)

Max Neunhöffer, Ákos Seress

July 2006 ISSAC '06: Proceedings of the 2006 international symposium on Symbolic and algebraic computation

Publisher: ACM

Full text available:  pdf(192.09 KB) Additional Information: full citation, abstract, references, index terms

Bibliometrics: Downloads (6 Weeks): 1, Downloads (12 Months): 17, Citation Count: 0

We describe a recursive data structure for the uniform handling of permutation groups and matrix groups. This data structure allows the switching between permutation and matrix representations of segments of the input group, and has wide-ranging applications. ...

Keywords: GAP, black-box group, computational group theory, constructive membership, large-base group, matrix group algorithm, permutation group algorithm
